delivery beds

**Birthing stool for delivery beds**

## BIRTHING UPHOLSTERY FOR GIVING BIRTH IN THE DELIVERY BED IN AN UPRIGHT POSITION

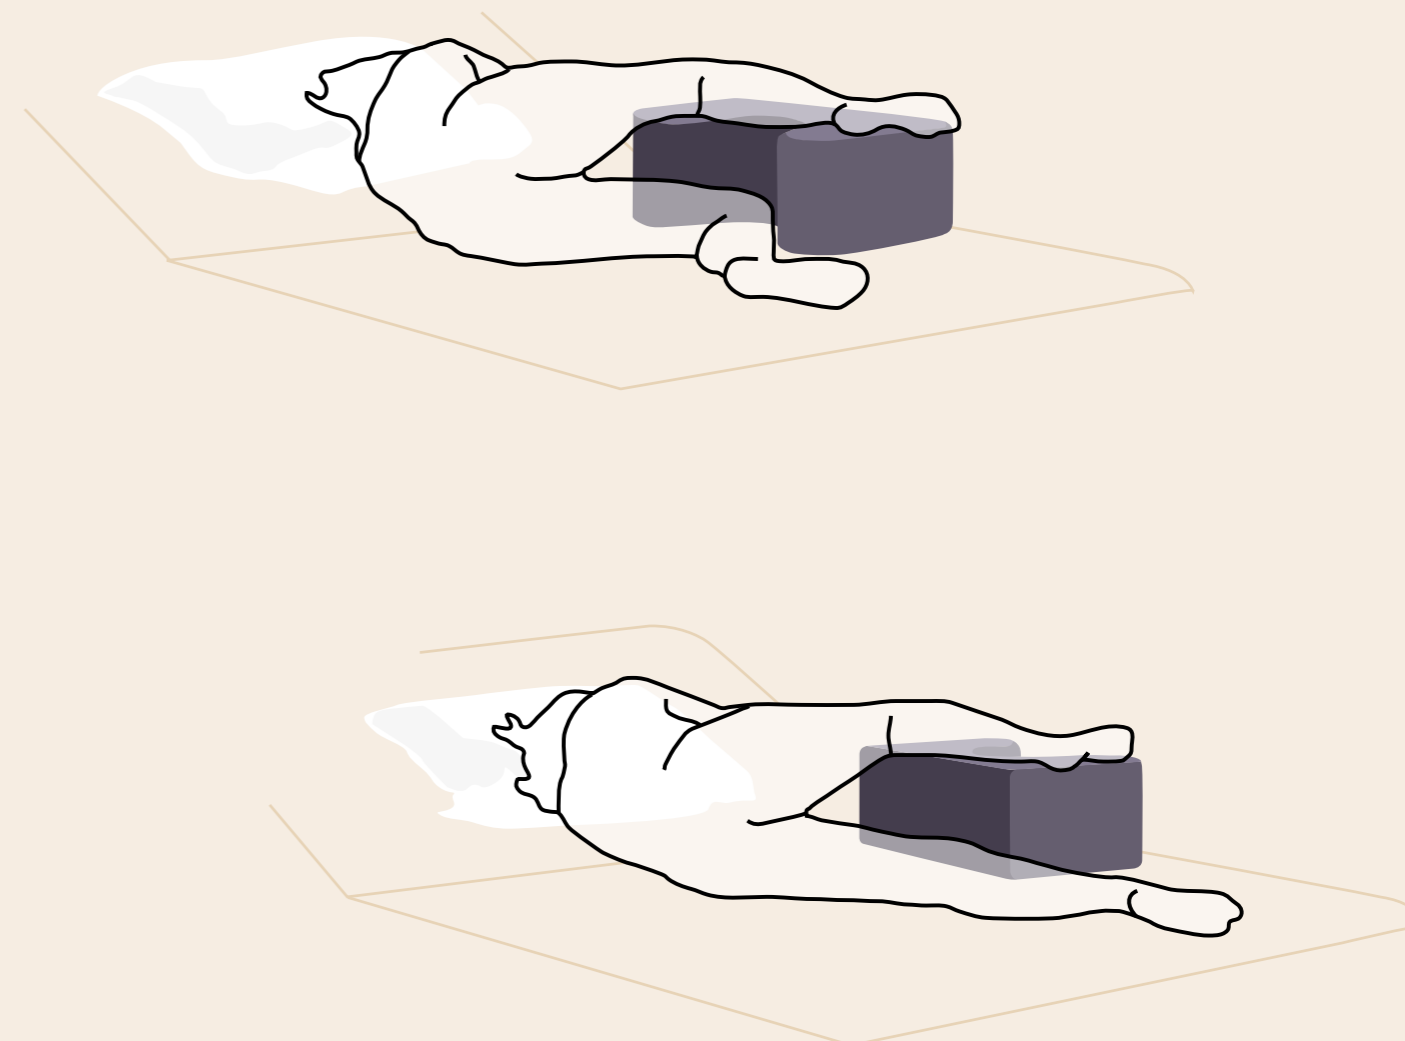

Support for pushing and holding tight to the rope

Support from the partner

### Birthing stool for delivery beds

- enables birthing in the delivery bed in an upright position with or without partner
- provides a comfortable working height for the midwife
- requires only very little turning and moving between bed and stool
- provides a lightweight and flexible working aid

## LATERAL POSITION SUPPORT

Lateral position with the upper leg being in an elevated position in order to widen the pelvic floor and outlet.

The birthing stool for delivery beds provides a comfortable support for knees and feet.

The upholstery form allows the mother-to-be to either stretch out her lower leg or hold it slightly bent.

Our PARENTIS birthing stool for delivery beds has been developed and tested in association with experienced midwives.
